3739

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on _____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-17 is/are pending in the application.
- 4a) Of the above, claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 5, and 7-17 is/are rejected.
- 7) ☒ Claim(s) 2-4 and 6 is/are objected to.
- 8) ☐ Claims _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are objected to by the Examiner.
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119

- 13) ☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).
- a) ☐ All b) ☐ Some* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

*See the attached detailed Office action for a list of the certified copies not received.

- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

Attachment(s)

- 15) ☒ Notice of References Cited (PTO-892) 18) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 16) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 19) ☐ Notice of Informal Patent Application (PTO-152)
- 17) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s). _____ 20) ☐ Other: _____

Art Unit: 3739

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: in page 2, line 12, the word 'patent' is a typographical error. It is assumed that this word is meant for 'patient.'

Correction is required.

2. The disclosure is objected to because of the following informalities: in page 2, line 15, the word 'patent' is a typographical error and needs to be deleted. The examiner suggests that the applicant proofread the content of the specification and correct all of the typographical errors.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 5, and 12-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3 and 5-8 of U.S. Patent No. 6,258,082

Art Unit: 3739

B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because they teach analogous ophthalmic laser surgery methods for treating presbyopic patient comprising the steps of providing ablative laser beams in the UV and in the IR wavelengths; and directing the ablative laser to the presbyopic eye to treat presbyopia.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

6. Claims 1, 11-13, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Schachar (U.S. Pat. No. 5,503,165).

Schachar discloses an ophthalmic surgery method for treating presbyopic patient by increasing the effective working distance of the ciliary muscle and the zonular fibers connected to the corneal lens of the eye. Here, 'the increase of the effective working distance of the ciliary muscle and zonular fibers' is treated to be analogous to the increase "via the movement of the ciliary body and zonal fiber," *as claimed*. Schachar teaches that the increase of the ciliary muscle

Art Unit: 3739

movement is accomplished by manipulation of the zonules with an external means such as surgical procedures, treatment with enzymes, heat or optical irradiation.

In reference to claims 11-13, he describes various laser sources that are suitable for the treatment including UV and IR lasers (see claims 12-31).

7. Claims 1, 5, and 12-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Lin (U.S. Pat. No. 6,258,082 B1).

Lin discloses ophthalmic surgery system and methods for treating presbyopic patient comprising the steps of providing ablative laser (UV and IR lasers); and directing the ablative laser to the presbyopic eye to treat presbyopia.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 5, 7-10, 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schachar in view of Odrich et al. (U.S. Pat. No. 6,280,435).

Schachar, described above, does not teach a method of scanning the treatment laser beams in a predetermined patterns around the area of the cornea.

Art Unit: 3739

However, Odrich et al. disclose an alternative method and systems for laser treatment of presbyopic comprising the step of scanning ablative laser in a preselected pattern to ablate predetermined portions of the corneal. They teach that the scanning is performed by using optical scanning elements such as rotating mirror and prisms (Col. 17, lines 60-64). They further teach the use of rotatable masks, variable width slits, and variable diameter iris diaphragms to generate the predetermined patterns. In reference to claim 9, Odrich et al. disclose translation device used for the scanning (see Col. 11, lines 8-16).

Therefore, it would have been obvious to one skilled in the art at the time of the applicant's invention to modify Schachar in view of Odrich et al. to scanning ablative laser in a preselected pattern in order to ablate predetermined portions of the corneal, and to use variable aperture devices in order to shape the ablative light to produce the predetermined patterns.

Allowable Subject Matter

10. Claims 2-4, and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3739

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See the following references:
